

## Major Colombian Bank Chooses Green Light Technology and GoAnywhere Director to Secure and Manage Transfers of Sensitive Data Files to Business Partners

### Case Study

Banco Davivienda, the third largest bank in Colombia, needed to implement data encryption and secure data transmission for sending sensitive files to its many business partners. After considering a variety of options, the company, working with Green Light Technology, evaluated and chose the GoAnywhere Director™ managed file transfer solution from Linoma Software.

GoAnywhere Director automates and secures the exchange of data with customers, trading partners and enterprise servers. It provides a single point of control with multi-step workflow abilities, management controls and detailed audit trails. GoAnywhere Director runs on nearly any IT platform and uses standard file transfer protocols including Secure FTP, FTPS, SFTP, HTTP, HTTPS, AS2, SMB, MQ and SMTP. It can also encrypt and compress files using popular Open PGP encryption, GPG, ZIP, GZIP and TAR standards.

Says, Luis Fernando Castilla, Department Coordinator for IT Security Management at Banco Davivienda, "With GoAnywhere Director we have been able to replace many difficult, manual file transfer processes with a variety of automated processes that eliminate the risk of information leakage. Our sensitive files that are designated for transfer are not exposed at any point in the transfer process and are automatically deleted from the transfer process once transmitted. In addition we have complete logging of all file transfers for auditing purposes."

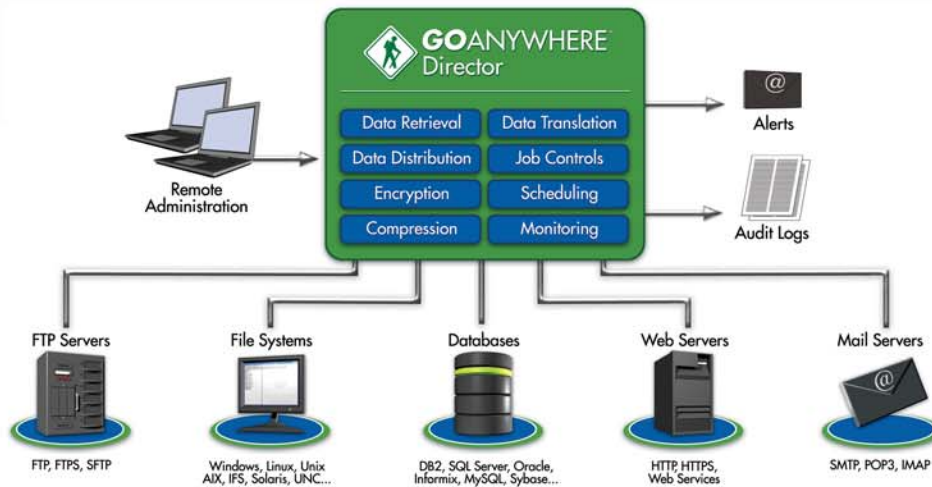

"With GoAnywhere we can even insert records in database tables, as well as parameterize and program repetitive executions that send

confirmation emails,” continues Mr. Castilla. “And with regards to customer support, maintenance and upgrades, we have always received immediate and expert attention by Green Light Technology and, if needed, Linoma Software.”

Today, Banco Davivienda has about 300 data encryption and secure data transmission projects implemented in its production environments, all of which are working automatically 24 hours a day, 7 days a week.

Adds Jaime Penagos, Regional Manager of Green Light Technology, an authorized IBM reseller and systems integrator, "Banco Davivienda started with two licenses of GoAnywhere Director and because of how well the product has worked in their organization has expanded their use to six licenses. And now we are in discussion about adding an additional

four licenses in the next few months. It is clear that the entire Banco Divivienda organization has found in GoAnywhere Director a solid standard for managed file transfer through its fully secure, automated and easy to use features."

Green Light Technology provides over 200 customers in Central and South America, as well as the Eastern United States, with next-generation IT solutions and expert professional IT services. With a selective group of engineers, many with more than 20 years experience supporting and implementing software solutions, Green Light Technology can meet the needs of any size company.

Linoma Software was founded in 1994 to provide technologies for protecting sensitive data and automating data movement. Linoma Software has a diverse install base of over 3,000 customers around the world including Fortune 500 companies, non-profit organizations and government entities.
